

**COMPONENT TYPE:**

**Reflective Heat Sleeve**

**CODE:**

**RS SERIES**

### Reflective Heat Sleeve

The reflective sleeve is a one piece fibreglass braided sleeve that is covered with an aluminium foil. The outer aluminium finish is highly reflective while the inner layer of fibreglass greatly increases insulation efficiency. The smooth and reflective outer surface provides a very effective barrier to extreme radiant heat for pipes, hoses, engine wire harnesses and other critical components requiring radiant heat protection.

The reflective sleeve offers a continuous protection working temperature range of -40°C to 160°C. It also provides excellent fluid resistance. The nature of the tubular construction gives great flexibility and allows for easy installation and conformation around complex components.

<b>Standard Sizes &gt;</b>		
<b>Part Number</b>	<b>Nominal internal diameter (mm)</b>	<b>Supplied as cut pieces (mm)</b>
RS-1010-0	10mm	Up to 1000mm
RS-1210-0	12mm	Up to 1000mm
RS-1610-0	16mm	Up to 1000mm
RS-1910-0	19mm	Up to 1000mm
RS-2510-0	25mm	Up to 2500mm
RS-3010-0	30mm	Up to 2500mm

Other sizes manufactured on request.

Pre-cut lengths available on request.
